UTILIZING ADVANCED TECHNOLOGIES, OUR TEAM PROVIDES THE HIGHEST QUALITY SOFTWARE AND SYSTEMS ENGINEERING SOLUTIONS TO THE INTELLIGENCE COMMUNITY.

At FiveTwelve we make a clear distinction between a business and a company. FiveTwelve is a small business that enables a company of talented people working together towards a common goal of achieving a higher quality of life while providing valuable services to our customers.

OUR STORY IS WHAT MAKES US UNIQUE

We started FiveTwelve because we were tired of working at large companies, where a person is a number. We wanted to create an environment with a flat structure, where ideas are accepted and tried, and people are respected. We strive to be the company where people stay because they want to, not because they have to. We love learning new technologies, having meaningful work, and getting rewarded for it. We love getting up in the morning and going to work with a smile on our faces. We work hard and focus to be able to enjoy an awesome feeling of achievement in the end!

We treat everyone with equal respect. No one is just a number. We listen to suggestions on how to make FiveTwelve better and work hard to find ways to implement those suggestions. We are committed to everyone who is a part of FiveTwelve. We are building a company where you work because you want to, not because it's just a paycheck.

JOIN OUR TEAM

FiveTwelve is dedicated to growing our team with talented professionals for a variety of technical positions. In addition to competitive salaries, we offer a variety of unique benefits including: Quarterly bonuses; Up to 6 weeks of PTO; 401k matching; A personal technology refresh budget.
